Metal Framing Systems

Gregory Industries has been in operation for over 100 years...dedicated to the highest product standards and performance. Our company is unique among strut manufacturers in that we control the entire strut manufacturing process. At Gregory, we start with mill produced black hot-rolled steel master coils...slit the coils in preparation for processing...continuous pickle and galvanize on our own specialty line...roll form and in-line punch...and package and ship. At Gregory our philosophy is straightforward and simple:

***FURNISH THE BEST QUALITY PRODUCTS,
WITH THE BEST OF CUSTOMER SERVICE,
AND AT THE BEST POSSIBLE PRICE.***

Finishes

Comprehensive list of available coatings/material types for **G-FORCE® PIPE HANGERS & SUPPORTS**

Pre-Galvanizing:

A zinc coating is applied by hot-dipping the steel coil on Gregory's specialty continuous galvanizing line. The channel is roll-formed, cut and/or punched as specified in conformance to ASTM 1011 for hot-rolled steel and ASTM 653 for hot-dipped pre-galvanizing, with a G-90 coating (0.90 ounces of zinc per square foot of steel).

Hot-Dipped Galvanized:

The material is zinc coated after fabrication providing an extra heavy total product protection on all surfaces. The channel is pretreated, pickled, and then dipped into tanks of molten zinc, creating an electrolyzed bond. HDG provides superior corrosion resistance for highly corrosive exterior applications as compared to pre-galvanized material. **G-STRUT®** hot-dipped galvanized is in conformance with ASTM A-123 specification.

Galvannealed:

A zinc coating is applied by pre-galvanizing the steel coil on Gregory's specialty continuous galvanizing line. The coil then passes through an additional heat induction process, creating a matted gray finish with an all alloy coating that is designed for its paintability. Galvannealed **G-STRUT®** is easily painted post-installation without costly pre-treatment.

Powder Coat or Electro Deposition

Coating (Green):

Electro-deposition coating, or E-Coat, uses electricity to deposit a smooth, thin, uniform layer of epoxy resin coating on the surface of a metal part. Powder coating electrostatically applies a uniform dry polyester powder to the metal surface. Both methods utilize an "oven-baked" durable painted finish. **G-STRUT®** is also available in custom colors.

Electro-galvanized:

Electro-galvanized, or "zinc plated," combines the steel and .5 mils of zinc that form a bond by an electrolysis process. Electro-galvanizing is most commonly applied to **G-STRUT'S®** small fittings and hardware.

Aluminum:

G-STRUT® channel is available in extruded Aluminum Alloy suitable for a variety of applications.

Black/Plain:

A plain finish is pickled, hot-rolled carbon steel with a light oil finish. There is no protection against red rust.

Yellow Zinc Dichromate (Gold):

The pickled and oiled fabricated part is immersed in an Electro-zinc plated bath and sealed with a yellow zinc dichromate creating a protective, iridescent yellow finish.

PVC Coated:

A polyvinyl chloride (PVC) plastic coating is bonded to the channel or accessory by immersing the part in fluid PVC tanks. PVC can be applied over galvanized or plain steel without costly pre-treatment.

Stainless:

G-STRUT® channel is supplied in type 304 stainless steel. Type 316 stainless steel is also available upon request.

Section i - Terms**GREGORY INDUSTRIES TERMS AND CONDITIONS OF SALE**

1. These terms and conditions ("TCA") shall, along with the quantities and price reflected in any material quote or order ("Quote") or ("Order"), constitute the complete understanding between Gregory Industries, Inc. ("Gregory") and Purchaser and shall supersede any and all prior terms and conditions, negotiations or other written and oral agreements. Unless specifically noted otherwise, in the event of any ambiguity between this TCA and any Order or Quote, the TCA shall govern.
2. This TCA shall be deemed accepted and agreed upon in full upon the either the written acceptance of the TCA, the receipt and acceptance of any goods delivered pursuant to the TCA or the payment for any goods shipped under the TCA whichever is the first to occur.
3. Gregory hereby excludes, rejects and disavows any and all non-conforming or differing terms, conditions or qualifications contained within any Purchaser order, quote or any other form of confirmatory memorandum, regardless of when or in what order such non-conforming or differing terms were delivered or offered to Gregory.
4. Each and every term set forth herein shall be deemed material and germane to the transaction. This TCA and any Order or Quote may not be modified by Purchaser in any respect and may only be modified by a writing signed by Gregory. This TCA and any Quote or Order shall not be subject to either oral modification or modification by conduct.
5. All payments are due within 30 days of the date of invoice ("Net 30") unless an extended term is agreed upon in a writing signed by a Gregory authorized representative. All payments beyond Net 30 shall be subject to compounding interest charges of .75%/month. Gregory reserves the right to suspend all performance if payment is later than Net 30 and also reserves the right to accept late payments at its sole discretion. No acceptance of any payment later than Net 30 shall be deemed to waive any right or future rights that Gregory may otherwise have to cancel or suspend its future performance.
6. Any Quote shall expire and be deemed revoked 30 calendar days after delivery of the Quote, unless otherwise specified, if there is no act of acceptance as such is defined in paragraph 2 herein. Delivery shall be deemed made upon the transmission by Gregory, by any means, of a Quote.
7. Any Quote which is delivered to Gregory and accepted by Gregory may only be changed or altered with the express written consent of Gregory.
8. All prices quoted herein are subject to change at the sole discretion of Gregory based upon the prevailing steel and related supplies markets. Gregory shall provide purchaser three (3) business days' written notice of any such price change.
9. This agreement shall be deemed made in Stark County, Ohio and any dispute herein shall be governed by the laws of the state of Ohio and the venue for any action or proceeding arising in any respect between Gregory and Purchaser shall be in either the state or federal court situated in Stark County, Ohio. Should any portion of this paragraph be deemed unenforceable then only such portion deemed unenforceable shall be struck.
10. In the event that Gregory has to employ attorneys to either enforce its rights, defend its rights or to seek payment or any other remedy available at law or equity, then purchaser agrees to pay for all attorneys' fees and costs expended by Gregory in any such action regardless of the outcome.
11. This TCA and the underlying materials quote shall be subject to termination at the convenience of Gregory without any further obligation whatsoever on the part of Gregory.
12. In the event of any breach or allegation of breach on the part of Gregory, the only damages for which Gregory may be held responsible shall be the cost of any cover (as defined by the Uniform Commercial Code) for a period of thirty (30) calendar days from the alleged date of breach. Gregory hereby disclaims and purchaser hereby waives any and all other damages whether arising under contract, tort or statute including but not limited to damages arising from alleged delay, non-delivery, lost profits, lost commercial expectancy, reputation or any other type or theory of damages.
13. Gregory reserves the right, at any point in time to request information concerning bonding, information related to mechanics' lien rights, or information related to the financial strength of purchaser. Such information shall, if requested by Gregory, shall be provided by purchaser within three (3) business days of any request. Failure to provide such information shall constitute a material breach.
14. Upon any act of breach, Gregory shall have the right to repossess product delivered, sue for all amounts due including attorneys fees as provided herein, suspend any further performance and or cancel any and all existing agreements without any further obligation by Gregory.
15. Gregory agrees to deliver the agreed product within the time specified in the Quote or Order or as soon as is commercially reasonable. Unless otherwise specifically noted, all deliveries are F.O.B. at Gregory loading docks. If shipped freight prepaid, the charge for freight will be added to the invoice. Risk of loss or damage shall be borne by purchaser and claims made directly with carrier.
16. **Gregory hereby disclaims any implied or express warranty or merchantability or fitness for an intended or any particular purpose. Gregory represents that the product shall reasonably conform to applicable federal and state specifications and Gregory will provide necessary material test reports representing such.**
17. Any and all claims for damaged, defective, nonconforming material or claims of shortages shall be made in writing to Gregory within 24 hours of delivery to Purchaser or such claims are deemed to be affirmatively waived.
18. Should any term or condition set forth herein be deemed by a court of competent jurisdiction to be unenforceable, then All other terms shall survive such ruling and shall be deemed to govern the parties' relationship.

BEAM CLAMPS

UNIVERSAL BEAM CLAMP – SERIES W100

-MALLEABLE-

APPROVED

Follow maximum recommended set screw torque values per MSS-SP-69

Size Range: 3/8" through 7/8" rod sizes.

Material: Malleable iron casting with a hardened cup point set screw and lock nut.

Finish: Plain.

Ordering: Specify rod size; finish; and series #.

Approvals: UL Listed for top or bottom of Beam. Complies with Manufacturers Standardization Society SP-69 (Type 19 & 23). FM approved for NFPA 13, maximum rated pipe size.

Function: Recommended for attaching hanger rod to top or bottom flange of a beam or bar joist, where the thickness of a joist or flange does not exceed 3/4". The open back design permits rod adjustment.

Installation: Must install in an upright position.

Also Available In: 304 Stainless Steel, Electro-Galvanized.

PIPE SLIDE ASSEMBLY – SERIES W121 to W127

- Size Range:** From 0" to 8" & 10" to 24" pipe size.
- Material:** Carbon steel tee with teflon slide plate, carbon steel base with teflon slide plate.
- Finish:** Plain.
- Ordering:** Specify pipe size, type and travel #. (see factory for ordering part #'s).
- Approval:** Complies with Federal Specification A-A1192A (Type 35) and Manufacturers' Standardization Society SP-69 (Type 35).
- Function:** Designed for the support of piping where horizontal movement resulting from expansion and contraction takes place and where a low coefficient of friction (from .05 to .07 dependent on load) is desired. Maximum Temperature 750 F.
- Note:** Series W121, W122 and W123 provide for longitudinal movement only. Series W124, W125 and W126 provide for both longitudinal and transverse movement of pipe. Series W127 accommodates up to 5 inches of horizontal movement in any direction.

RETAINING STRAP – SERIES W115

Material:	Low Carbon Steel
Finish:	Plain
Ordering:	Specify rod size; finish; Length and series #.
Function:	Designed to eliminate possible movement of the beam clamp due to vibration.
Available In:	Electro-Galvanized, 304 & 316 Stainless Steel.
Note:	Used with the Steel C-Clamp, W200 Series. Add 1 inch to beam flange width to determine length of strap.

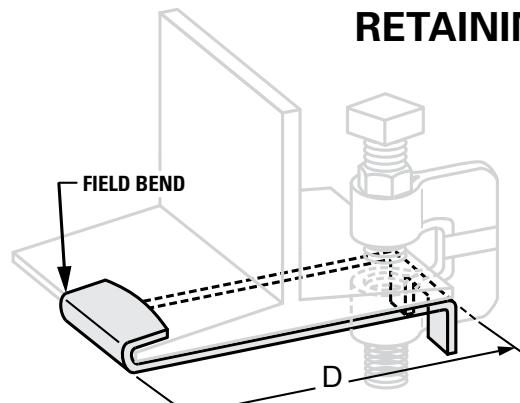

PART #	PRE-BENT STRAP LENGTH (D)	MATERIAL SIZE	LBS./100pcs
W115144	4-1/2"	11ga. x 1"	15

RETAINING STRAP – SERIES W116

Material:	Low Carbon Steel
Finish:	Plain
Ordering:	Specify rod size; finish; Length and series #.
Function:	Designed to eliminate possible movement of the beam clamp due to vibration.
Available In:	Electro-Galvanized, 304 & 316 Stainless Steel.
Note:	Used with the Steel C-Clamp, W210 Series. Add 1 inch to beam flange width to determine length of strap.

STEEL C-CLAMP – SERIES W200 & W201

APPROVED

Follow maximum recommended set screw torque values per MSS-SP-69

Size Range:

3/8" and 7/8" rod size.

Material:

Carbon Steel with a hardened cup point set screw and available with or without a lock nut.

Finish:

Plain.

Ordering:

Specify rod size; finish; and series #.

Approvals:

UL Listing and FM Approved for NFPA 13, maximum rated pipe size. Complies with Federal Specification WW-H171E (Type 23) and Manufacturers Standardization Society SP-69 (Type 23).

Function:

Designed for structural attachment of hanger rod to bottom flange of a metal beam, purlins, channel or angle iron. The hanger rod should make contact with the beam flange to ensure full engagement.

Available In:

Electro-Galvanized & 304 Stainless Steel.

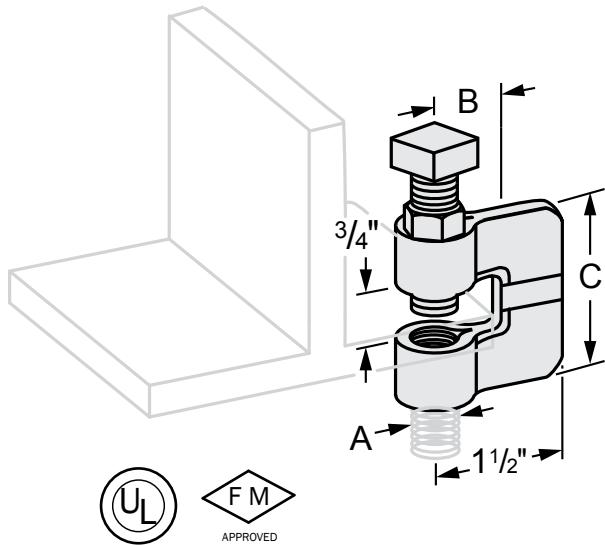

Notes:

ADJUSTABLE / MALLEABLE CLAMP

ADJUSTABLE STEEL BEAM CLAMP – SERIES W226

Size Range: 3/8" through 5/8" rod sizes.

Material: Low Carbon Steel.

Finish: Plain.

Ordering: Specify rod size; finish; series #.

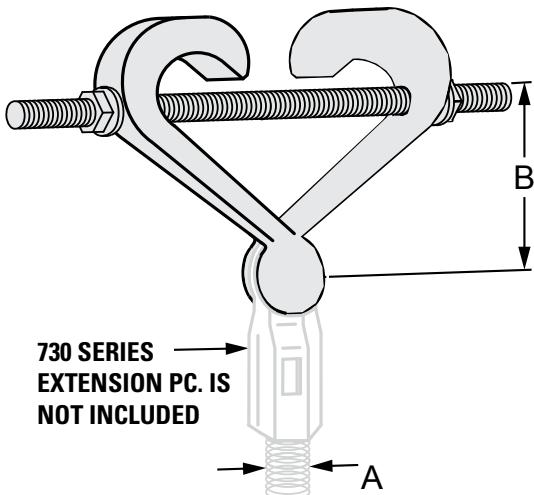

Function: Designed to be used in the suspension of a hanger rod from an I-beam. The clamp is adjustable from 3-1/2" to 8" and can be used with flange thickness up to 3/4".

Available In: 304 & 316 Stainless Steel

All beam clamps are plain steel.
To order other finishes, change the 5th character in the Part # as seen below:
STAINLESS STEEL (304) = 8
STAINLESS STEEL (316) = 0
Example: **W226-103** = STAINLESS STEEL 8

CENTER LOAD BEAM CLAMP

STEEL C-TYPE CLAMP – SERIES W227

Size Range: 3/8" through 1-1/4" rod size.
Material: Carbon Steel.
Finish: Plain.
Ordering: Specify width of flange; series # and finish.
Function: Designed to be used in the suspension of a hanger rod from the center of an I-beam. The clamp's design allows the load to be distributed equally on either side of the beam. This clamp allows approximately 2" of vertical adjustment.
Available In: 304 & 316 Stainless Steel

IRON PIPE SWIVEL RING

IRON PIPE SWIVEL RING HANGER w/ SECURED INSULATION SHIELD – SERIES W303

Size Range: 3/8" through 3/4" rod size.
Material: Low Carbon Steel.
Finish: Pre-Galvanized
Ordering: Specify rod size; inside shield diameter and series #.
Function: Design for suspension of insulated pipe lines. Series W303 is a combination of our Series W561 shield welded to a Series W305 hanger, which ensures that the shield will be installed in conjunction with the hanger. Series W303 allows vertical adjustments after installation and offers maximum protection from crushing of the insulation by the hanger.

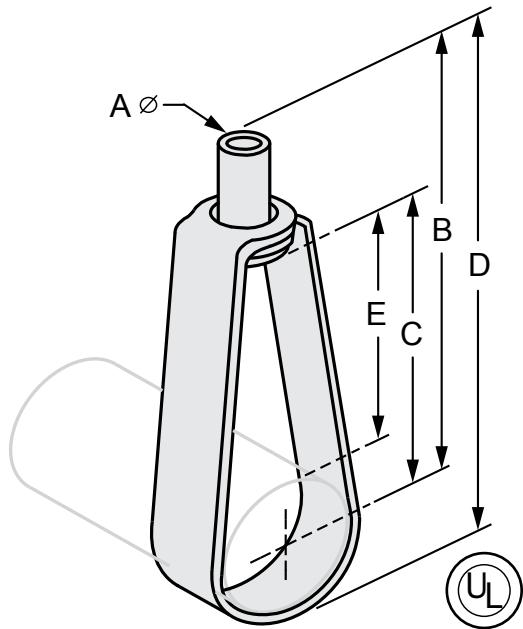

Available In: :304 and 316 Stainless Steel
Note: All shields furnished with flared ends.

Above pipe swivel rings are pre-galvanized. To order other finishes, change the 5th character in the Part # as seen below:

CLEVIS HANGER w/ SECURED INSULATION SHIELD – SERIES W412

Size Range: 3/8" through 1-1/4" rod size.

Material: Low Carbon Steel.

Finish: Plain low carbon steel clevis with pre-galvanized shield

Ordering: Specify rod size; inside shield diameter and series #.

Function: Design for suspension of stationary insulated pipe lines. Series W411 is a combination of our Series W561 shield welded to a Series W412 clevis hanger, which ensures that the shield will be installed in conjunction with the hanger. The shield is furnished with flared ends to prevent it from cutting into the insulation.

Available In: 304 and 316 Stainless Steel.

UNDERGROUND PIPE

FOUR BOLT UNDERGROUND PIPE – SERIES W502

- Size Range:** 3" through 24" pipe size.
- Material:** Low Carbon Steel.
- Finish:** Plain.
- Ordering:** Specify pipe size; finish and series #, order Series W504 washer separately.
- Approval:** Complies with National Fire Protection Association Standards 24 for 4"-12" pipe.
- Function:** Designed for clamping the caulked joints of underground A.W.W.A. ductile iron water pipes lines to prevent separation of joints.
- Available In:** Electro-Galvanized, 304 & 316 Stainless Steel.
- Note:** Clamps must be connected by means of threaded tie rods and the nuts drawn tight on the washers to assure a tight joint.

DOUBLE BOLT PIPE

DOUBLE BOLT PIPE CLAMP – SERIES W521

Size Range: 3/4" through 24" pipe size.
Material: Low Carbon Steel.
Finish: Plain.
Ordering: Specify pipe size; finish and series #.
Approvals: Complies with Federal Specifications A-A-1192A (Type 3) and Manufacturers' Standardizations ANSI/SP-69 and SP-58 (Type 3).
Function: Designed for the suspension of high temperature insulated pipe lines. Normally used in conjunction with Series W715 weldless eye nut or Series W868 welded eye rod to allow flexibility at the rod attachment. The clamp can be used with up to 4" of insulation and temperatures up to 750 F.

Available In: Electro-Galvanized, 304 & 316 Stainless Steel.

All pipe clamps are plain steel. To order other finishes, change the 5th character in the Part # as seen below:

STAINLESS STEEL (304) = 8

SELF CENTERING SHIELD

SELF CENTERING INSULATION SHIELD – SERIES W561

- Material:** Low Carbon Steel.
- Finish:** Pre-Galvanized
- Ordering:** Specify inside shield diameter and series #.
- Function:** Design to provide maximum protection to the insulation. The centering ribs are spaced to center the hanger on the shield, providing equal load distribution. The shield is furnished with flared ends to prevent it from cutting into the insulation.
- Available In:** 304 and 316 Stainless Steel.
- Note:** All shields furnished with flared ends.

WEDGE ANCHOR – SERIES W842

- Size Range:** 3/8" through 5/8" long
Material: Low Carbon Steel.
Finish: Electro-Galvanized.
Ordering: Specify rod size; length; and series #.
Function: Designed to be driven into a pre-drilled hole. The expansion of the case is controlled by the tightening of the nut, this eliminates the need for an exact hole size. Useful in applications where a high resistance to vibratory loads is desired.
Note: Please consult factory for length (D).

SELF DRILLING SNAP-OFF FLUSH – SERIES W841

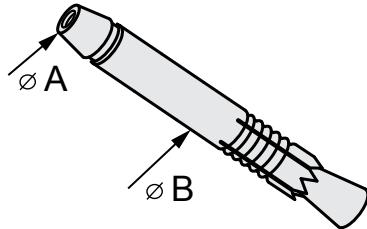

Size Range: 3/8" through 5/8" long

Material: Case Hardened Steel.

Finish: Electro-Galvanized.

Ordering: Specify rod size and series #.

Function: Designed to function as a drill, drilling its own hole and as an anchor. The tapered chuck end of the anchor is attached to an air hammer, then after drilling is complete, the tapered end snaps off leaving the anchor flush with the wall. Useful when a large number of anchors are to be installed.

DOUBLE EXPANSION SHIELD – SERIES W850

Advantages/Features:

- Can be used for fastening into rock, concrete, brick, ect.
- Eliminates high stress points detrimental in fastening into materials of medium hardness, expands full & high gripping power.
- Ideal for sheer loads or where bolt is subject to side pressure or vibration.
- Does not fracture, and permits fastening at any length.

Installation Instructions:

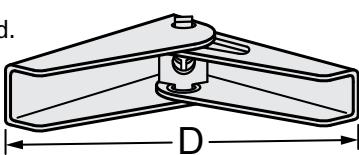

1. Drill hole of recommended diameter (slightly deeper than length of shield).
2. Shield should be flush or slightly below surface of masonry. Place fixture. Insert machine bolt and tighten.
3. A deep setting increases holding power of masonry. If needed, place a pipe sleeve between shield & fixture being attached.
